Choose From the Family of
Quality Bobcat Grease

Whether it's Bobcat® compact products, attachments or other types of equipment in your business, they require regular lubrication to ensure high performance and minimal downtime. Your Bobcat dealer offers a choice of three different Bobcat branded greases to protect machine components in a wide range of operating conditions.

Property	Multi-Purpose Grease	Supreme HD	Extreme HP
Thickener type	Lithium complex	Lithium complex	Lithium complex
Wear resistant additive type	Anti-wear	Extreme pressure	Extreme pressure
Molybdenum (MoS)	No	No	Yes - 3%
Polymer (water wash)	Minor	Major	Major
Low temperature pumpability *Automatic system*	Best	Good	Not recommended
Low temperature pumpability *Hand greasing*	Excellent	Excellent	Keep grease warm
Part Number	6903122	6687884	6687885

Bobcat®

Grease

THERE'S A **BOBCAT GREASE** FOR YOUR APPLICATION

Bobcat Multi-Purpose Grease

Main Characteristics

- High performance lithium-complex grease
- Formulated with high quality base oils and anti-wear additives
- Excellent rust and corrosion protection for prolonged equipment life with protection in wet conditions
- Designed for routine and moderately loaded applications
- Daily regreasing required

Performance

Excellent protection of lubricated equipment with potential for extended life and reduced maintenance.

Rust & Corrosion Protection

Reliable equipment protection against rust and corrosion.

Long Life

Excellent high temperature performance with long grease life and reduced maintenance potential.

Seal Compatibility

Good seal compatibility degreases degradation and swelling of seal materials.

Drop Point
500˚F (260˚C)

Color
Green

P/N 6903122

Bobcat Supreme Heavy-Duty Grease

Main Characteristics

- Extra high-performance lithium-complex grease with extreme pressure additives
- Excellent protection against rust, corrosion and water, especially axles, rings, and bearings
- Superb adhesion and structural stability and Resistance to water wash out
- Provides high temperature performance in severe operating conditions
- Formulated excellent protection in wet conditions and under heavy shock loads
- Ideal for lube points with sliding and pivoting movements
- Daily regreasing recommended

Performance

Highly adhesive and cohesive structure; broad multi-purpose application. Reduced leakage and extended re-lubrication for reduced usage. Very good anti-wear and extreme pressure performance.

Seal Compatibility

Contains polymer to add tackiness to resist "fling off" from grease collar at seal/bushing.

Drop Point
536˚F (280˚C)

Color
Blue

P/N 6687884

Bobcat Extreme High-Performance Grease

Main Characteristics

- Extra high-performance extreme pressure grease made with proprietary high-temperature, lithium complex thicker
- 3% molybdenum disulfide for excellent adherence to all surfaces and resistance to softening ensuring good adhesion and cohesion
- Provides exceptional protection against wear and heavy shock loads, also in wet conditions
- Operating temperature from -10˚F (-23˚C) to +350˚F (177˚C)
- Daily regreasing recommended but can be extended as appropriate for the application

Performance

Heavy-duty, unleaded contractor/mining grease. Good pumpability at low temperatures. Excellent water resistance and extreme pressure capabilities.

Seal Compatibility

Contains polymer to add tackiness to resist "fling off" from grease collar at seal/bushing.

Drop Point
500˚F (260˚C)

Color
Grey
