

Applications

Snow Removal

Main features

The open bottom and wide body deliver strong pushing power, for maximum snow removal speed and efficiency

Collect and push snow with ease and speed!

Flotation and oscillation of the moldboard keeps the snow pusher in contact with the ground without damaging equipment or property, allowing you to remove snow on decorative and uneven surfaces

When removing snow on flat surfaces, or when clearing hard packed snow, the flotation feature can be locked into a rigid position

The cutting-edge rear support provides added strength to the moldboard

Exterior gusseting reduces snow build up inside the boxed blade

Ideal for clearing packing lots, driveways and building sites
