Main features

Overlapping blades ensure clean root cutting and support of the root ball
Two types of blades are available to best suit your particular tree root and soil condition.
The cone type, with a 30° angle, preferred for hard or sandy soils and lighter ball weight and the modified blade, the most popular, has an angle of 25°. It offers a larger tree ball for better root protection
3 tree transplanter models are available to best fit your machine and tree transplant requirements ¹

The swing-open gate with open frame design gives you easy access to the tree
All-electric control from the operator's seat for added comfort

1. Note: Convertible tree transplanters can be equipped with either a pendant-style (rocker switch) control panel or a 7-pin ACD control kit. Tree transplanters with pendant control can be installed on all Bobcat loader series; tree transplanters with 7-pin ACD control must be installed on G-Series and more recent loaders. You must order a pendant control kit or 7-pin ACD conversion kit for all tree transplanters with convertible control.
